

## **To all monotype-XV sailors and owners:**

### **The results of the mail vote april 2018 are as follows:**

Question number one was about forestay and shroud materials.

Option 1A; to make the materials optional got 5 votes.

Option 1B; to specify steel cable only got 22 votes; more than the constitutionally demanded 2/3 majority of the vote so the specifications will be changed to:

3.7.1 Forestay shall be steel cable 7 mm or more in diameter

3.7.2 Shrouds shall be steel cable 6 mm or more in diameter

Proposal number two was to add carbon fibre to the list of allowed materials for the steel runner stiffeners in 3.5.2.1 This got 6 votes

Option 2B: No change to 3.5.2.1 got 21 votes so specification 3.5.2.1 will not be changed.

We will make sure all the changes decided on in the board meeting 2018 and in the annual meeting 2018 and in 3.7.1 and 3.7.2 as above in our specifications and drawings will be published on the website by June first 2018
